

OCL
VISION®

Your Guide to SmartSight™
and a *Brighter Tomorrow*

WELCOME TO OCL VISION

At OCL Vision, we're not only committed to providing exceptional surgical care and lasting peace of mind with our 15-year guarantee* on LASIK, PRK, LASEK, or SmartSight™ laser vision correction for myopia (short-sightedness) and astigmatism; we also understand the importance of **making our treatments accessible**. That's why we offer a range of flexible payment plans designed to suit your needs. We believe that financial considerations should not stand in the way of achieving better vision.

Vision is a precious gift that profoundly impacts your quality of life, and you deserve the opportunity to see more clearly without being restricted. Our clinic was born from a collaboration between world-renowned, UK-trained eye surgeons, merging their successful practices to harness a wealth of resources. This fusion has enabled us to deliver **unparalleled surgical expertise alongside the latest technological innovations**. In 2024 we won the Laing Buisson Healthcare Award in the category of best healthcare outcomes in the UK. When choosing a surgeon for eye surgery, the key is

to find someone who puts your needs first, blending exceptional skill and dedication with a commitment to state of the art eye care advancements.

Our team comprises of leading surgeons known for their surgical excellence and compassionate approach to patient care. With comprehensive training in the UK and globally, specialising in cornea, cataract, and vision correction surgery, our surgeons ensure you're in the safest possible hands, with a track record of over 75,000 successful procedures.

We consistently ensure you are fully informed about the treatments best suited to you, clearly explaining the nature of the surgery, its expected outcomes, and the entire treatment process. Throughout your journey, we provide reassurance and tailor our approach to meet your specific needs and achieve your vision goals.

Choosing OCL Vision means entrusting your eyes to experts who truly care about your vision and well-being, backed by a strong commitment to your long-term satisfaction with flexible payment options to ensure that our first-class eye care solutions are within reach for you.

SMARTSIGHT™

About the SURGERY

Following your detailed consultation and specialist tests with us at OCL Vision, we are delighted to confirm that you are suitable for SmartSight™ Laser Vision Correction.

SmartSight™ is a truly life-enhancing procedure, offering you freedom from the daily dependence on glasses and contact lenses. This advanced form of laser vision correction can provide you with a fresh perspective and **significantly improve your quality of life.**

With exceptional laser technology, SmartSight™ is one of the **safest and most precise procedures available today.** Designed to correct a wide range of prescriptions, it offers a minimally invasive approach with rapid recovery times.

Clinical studies confirm the durability and safety of the results, allowing patients to enjoy long-term visual clarity.

At OCL Vision, our surgeons are renowned for their meticulous attention to detail and exceptional surgical expertise. Combined with state-of-the-art technology, we deliver **outstanding outcomes tailored to each patient's needs.**

With one of the highest Trustpilot scores for laser eye surgery nationwide and world-class published results, **you can trust us** to prioritise your vision, safety, and overall well-being.

SmartSight™ laser eye surgery uses advanced femtosecond laser technology to reshape the cornea and correct vision.

The SCHWIND ATOS femtosecond laser creates a precisely calculated lenticule, or thin piece of corneal tissue, within the intrastromal layer of the cornea. This lenticule is custom designed to correct your specific vision error.

The surgeon then removes this lenticule through a small, 3mm keyhole incision, which is over 80% smaller than the incision required for LASIK. This minimally invasive approach eliminates the need for a LASIK corneal flap, resulting in fewer nerve transections and reducing the risk of postoperative dry eye.

The entire refractive correction is performed using a single laser system, allowing you to remain in one position throughout the procedure. SmartSight™ can treat myopia and astigmatism, **offering a precise and gentle method** that leaves the upper corneal layers largely untouched.

The procedure is quick, typically taking only 4-5 minutes per eye, and you will experience rapid visual recovery and minimal discomfort.

What do I need to do to PREPARE FOR TREATMENT?

You will need to:

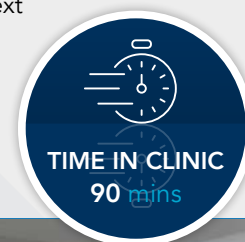

- **Sign your consent form:** This can be completed electronically via the surgery pack sent to you through DocuSign at the time of booking. It also includes an explanation of your aftercare plan.
- **Bring sunglasses:** These will help protect your eyes and keep them comfortable on your journey home.
- **Avoid eye makeup:** Do not wear any eye makeup on the day of your treatment.
- **Remove contact lenses:** Stop wearing contact lenses for at least three days before your procedure.
- **Plan your journey home:** Arrange for someone to accompany you or pick you up after the procedure. As part of our elite concierge package, we can organise your travel and any accommodation need.
- **Download our free dropAdrop reminder app** from the App Store or Google Play. The app sends you notifications to make sure you don't miss any of your aftercare drops.

What happens on THE SURGERY DAY?

- You can expect to be at the clinic for up to **90 minutes**.
- **Arrival and consent:** Upon your arrival, we will welcome you to the clinic and confirm that you have signed the consent form.
- **Pre-surgery consultation:** You will have a consultation before the procedure, during which we will explain the treatment and answer any questions you may have.
- **Aftercare discussion:** A nurse will guide you through the aftercare process, explaining how to care for your eyes immediately after surgery and in the days that follow. You will receive your aftercare drops, along with clear instructions on their usage to promote optimal recovery and healing. Additionally, we will inform you about your three main **follow-up appointments**, which are already scheduled for **1 day** and **3 months after surgery**. Should you feel the need for additional follow-ups, you are welcome to book them at no extra cost for up to one year after your procedure.
- **Surgeon's check:** Your surgeon will examine your eyes both prior to and immediately after the procedure to ensure everything is in order.
- **The procedure:** The surgery itself is carried out in the laser suite and typically takes around 10–15 minutes for both eyes.
- **Final check:** Before you leave, we will ensure everything is as it should be and send you home with your sunglasses on.
- **Returning to work:** While you may feel well enough to return to work the next day, we recommend having a light day to allow for proper recovery.

Considering SmartSight™ vision correction?
Here is some guidance that will answer some of your questions.

After 24 hours

SHOWER/ WASH HAIR

Do not wet your eyes
directly for 1 week

48 hours

DRIVE/WORK

Wear your eye shields
at night

3 days

MAKE-UP

Do not wear eye
make-up

3 days

CONTACT LENSES

Remove contact lenses.
Take surgeon's advice

After 2 days

LIGHT EXERCISE

Full exercise 5 days after
treatment

1 week

FLY

Take advice from
your surgeon

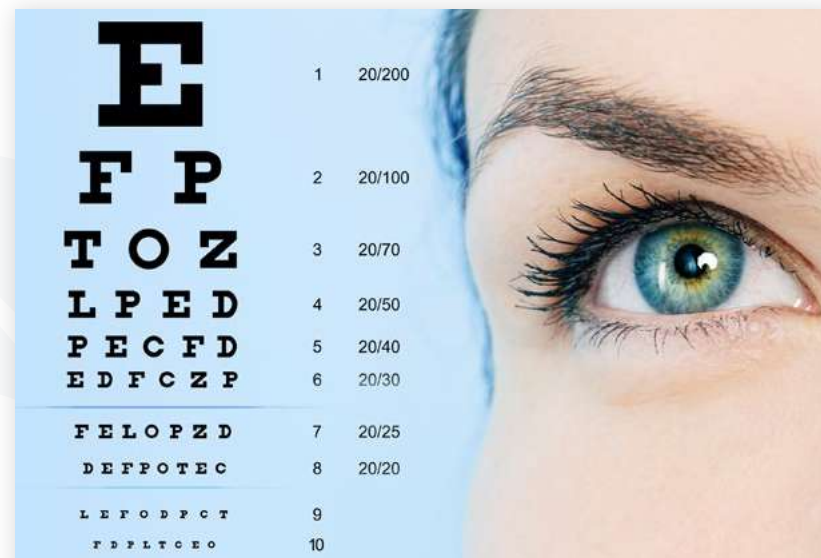

Up to 90 minutes

TIME IN CLINIC

You can expect to be at the
clinic for up to 90 mins

NOTE: Timings may vary depending on your individual circumstances,
please check with your surgeon.

20/20 VISION CHART EXPLANATION

The 20/20 vision chart helps assess your visual acuity,
measuring how clearly you can see letters or symbols from a
distance of 20 feet.

If your vision is 20/20, you see what someone with normal vision
sees at 20 feet. But if it's 20/40, you need to be 20 feet away to
see what others see at 40 feet.

The chart has rows of decreasingly sized letters or symbols.
Some people have sharper vision than 20/20, like 20/15 or even
20/10, **achievable with modern vision correction techniques** like
laser eye surgery. For instance, if someone has 20/15 vision, they
can see at 20 feet what a person with normal vision would need to
be at 15 feet to see clearly.

At OCL Vision, we're here to discuss your options and guide
you towards superior visual clarity. Most of our patients
experience better vision than they used to before with glasses
or contacts.

PATIENT TESTIMONIALS

“ I had wanted laser eye surgery for years but kept putting it off, thinking, “It’s not that bad; I can see well.” I also wanted a less invasive option with minimal risk of dry eyes.

When I heard about SmartSight, I did months of research and was impressed by its **advanced features**: a 3mm incision, no flap, and eye tracking. It ticked all the boxes, so I finally booked in with OCL Vision. The consultation was thorough, with detailed eye checks and a clear explanation of the process. On the day of surgery, I was nervous, but the team were fantastic. The procedure itself was

quick - about 10 minutes - and painless. Everything was hazy at first, like being in a sauna, but by the next morning, I could already see clearly.

Now, three weeks later the results have been amazing. **It’s been a life-changing experience**, and I’m so grateful to the professionals at OCL Vision for making it happen.

Ed

I recently had bilateral SmartSight laser vision correction with OCL Vision, and I couldn’t be happier with the results.

Within just a few days, I was already seeing better than 20/20, despite having a significant prescription.

I took time to explore my options by attending consultations at multiple clinics, but I chose OCL Vision because **they provided the clearest explanation** of the treatment best suited for my eyes. They were also transparent about the minimal risks and addressed all my concerns.

The day of the surgery was seamless. The team made me

feel comfortable throughout the process, and **their professionalism was outstanding**. I highly recommend OCL Vision to anyone considering laser vision correction - it’s been a life-changing experience!
